

# HemoWeld - BATTERY

COMPACT - LIGHT - QUICK

**DELCON**

*Our technology Your health*

# KEY FEATURES

6

*HemoWeld-Battery is the easiest way to perform sterile sealing procedures.*

- 1. Portable** - supplied with a comfortable shoulder bag
- 2. Lightweight** - less than 1 kg
- 3. Lightning quick** - allows for an almost instantaneous sealing motion
- 4. Powerful** - can perform more than 500 procedures
- 5. Long-lasting** - rechargeable battery pack
- 6. Easy snap-apart separation** - a clear-cut notch line makes for an easy separation of the tube
- 7. Ergonomic handle** - with integrated splash-guard and tube retention
- 8. Anti-spark & overheat protection systems** - to avoid damage to system and tubing
- 9. Alerts notifications** - a beep and LED signals to indicate possible problems

7

9

**HemoWeld-Battery** is a **compact** and **lightweight** tube sealer, easy to use and to clean, supplied together with a comfortable shoulder bag: it can be used to seal most of standard tubing available on the market. Its new built-in RF electronics **optimize the power consumption**, allowing more than 500 procedures with a fully charged battery.

Each seal by HemoWeld-Battery has a **notch** facilitating the snapping-apart of the two parts. The anti-spark and overheat **protection** system, standardly included, avoids any possible damage to the system and to the tubing. The **tube positioning system** is integrated into the **splash guard**. Any possible presence of sparks while sealing, dirty electrodes or low battery is indicated by a beep and LED signals.

HemoWeld-Battery is **certified** to work even with the needle still connected to the patient/donor.

## Acoustic Alerts

Together with a dynamic LED signal, a beep indicates any problem, such as sparks during the sealing process, dirty electrodes and the low-level charge of the battery.

## Ergonomic Handling

A redesigned body shape fit perfectly in your hand, making the sealing motion natural and comfortable. The new splash guard is safe for the operator and easy to remove and clean.

## Long Lasting Battery

The built-in RF electronics optimize the power consumption, which means more consecutive sealings. The battery pack is rechargeable and each charge will last more than 500 procedures.

## Sales Codes

HWELD-B.DB.00      Mobile tube sealer for blood bags tubing  
(includes RF generator, battery charger, shoulder bag and spare coaxial cable)

## Regulation

CE marking:              Complies with Class 1 Medical Device according to directive 93/42 MDD and 2007/47 MDD  
Safety Class:              1  
Applied part:              CF

Delcon reserves the right to modify, add, and remove the functional and visual features of the devices, at its sole discretion, at any time, and without prior notice

# HEMOWELD - B

IS PART OF THE HEMOWELD LINE

A range of products specifically designed to produce sterile seals on standard PVC tubing normally used in conjunction with blood bags.
